

ANTI THEFT TSA COMBINATION LOCK

Please ensure that the factory preset combination "0 - 0 - 0" operates the lock before leaving the retailer.

TO SET YOUR COMBINATION LOCK:

- 1) Ensure that the zipper heads are not in the lock.
- 2) Ensure that the dials are set to "0 - 0 - 0" (b).
- 3) Push in the "reset" button on the side of the lock (a) in the direction of the arrow. (You will note that the reset button will remain depressed)
- 4) Set your new combination number by rotating the dials (b) to select your desired secure number.
- 5) When you are happy with your selected 3 digit combination, push button (c) in the direction of the arrow to set your new combination number. If done correctly you will hear a "click" sound and the reset button (a) will pop back out.

Your new combination is now set. Please keep your combination safe - if you forget it there is no way to open your case!

WARNING: If the lock has been opened please ensure that the cylinder is rotated back to the locked position as indicated by the arrow. (Any "tool" which can be inserted into the cylinder and rotate to lock)
